

# CREATE IBM WATSON IOT PLATFORM AND DEVICE

Date:	10 NOVEMBER 2022
Team ID:	PNT2022TMID05282
Project Name:	GAS LEAKAGE MONITORING AND ALERTING SYSTEM FOR INDUSTRIES

The screenshot shows the IBM Cloud Dashboard. At the top, there's a navigation bar with 'Dashboard' and a dropdown arrow. To the right are links for 'Edit dashboard', 'Upgrade account', and a blue 'Create resource' button. Below the navigation bar, there's a 'For you' section with a 'Select an option' dropdown. This section contains several cards: 'Build' (purple), 'Monitor your resources' (5 min), 'Build and deploy Node.js apps' (15 min), 'Get started with machine learning + Watson Studio' (10 min), 'Plan your hosting environment' (2 min), and 'IBM Cloud Service' (2 min). Each card has a 'Getting started' button. Below this, there's a 'User access' section with a 'Manage users' link and a text input for email addresses. To the right is a 'News' section with a 'View all' link, showing a headline about 'Announcing IBM Cloud Pak for Network Automation Version 2.4'. Further right is a 'Planned maintenance' section with a 'View all' link.

The screenshot shows the IBM Cloud Resource list. At the top, there's a navigation bar with 'Resource list' and a blue 'Create resource' button. Below the navigation bar, there's a table with columns: Name, Group, Location, Product, Status, and Tags. The table has a search bar and several filter dropdowns. The table content shows a list of resources categorized by type: Analytics (0), Blockchain (0), Databases (1+), Developer tools (1+), Logging and monitoring (0), Migration (0), Integration (0+), Internet of Things (1), Security (0), Mobile (0), and Other (0+). The 'Internet of Things (1)' category is expanded, showing a single resource: 'Internet of Things Platform-68'. This resource is in the 'Default' group, located in 'Frankfurt', is an 'Internet of Things Platform', and its status is 'Active' (indicated by a green dot). The table also shows a 'Tags' column with a minus sign and a dropdown arrow.

**Result:**

An IBM Watson cloud for IoT and a device is created successfully.
